

This lab helped us learn the concepts of inheritance, polymorphism, and a continuation of exception handling. We used inheritance to derive the Student class from the Item class and the Stack and Queue class from the Student class. This means that the Stack and Queue class can access the Item's class based on whatever accessor type we give it. Polymorphism was used with our Add Item function which chose between the Stack or Queue AddItem() based on whatever the user chose at the beginning of the program. We also added a few "try catch" blocks to this program to cover any exceptions. These concepts are important for a career in engineering because inheritance is one of foundation concepts to all large code bases. There is a massive amount of code and efficiency is a big thing to think about all the time so having a good inheritance and using polymorphism can make your program easier to use and edit.

Task 2:

```
C:\Users\Zack Johnson\source\repos\sliters\EEC
- Select Option to Start Program -
1. Set max size
2. Set as default (20)
Enter: 1
Enter max size: 5

~~~MENU~~~
1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit

Enter: 1
- Create student parameters -
Enter M number (integers only): 1
Enter First Name: 1
Enter Last Name: 1
Enter Birthday: 1
Enter GPA: 1

Student added.
```

Set Max Size and Add Item

```
~~~MENU~~~
1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit

Enter: 2

mNumber: 2
First Name: 2
Last Name: 2
Birthday 2
GPA: 2

Student Removed.
```

GetItem

~~~MENU~~~

1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit

Enter: 3

The list is empty

IsEmpty

~~~MENU~~~

1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit

Enter: 4

The list is not full

IsFull

~~~MENU~~~

1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit

Enter: 5

Size of List: 1

ClearList

### Task 3:

```
- Select Option to Start Program -
1. Set max size
2. Set as default (20)
Enter: 1
Enter max size: 5

- Select Type of List -
1. Stack
2. Queue
Enter: 1

Creating a Stack...

~~~MENU~~~
1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit

Enter:
```

Set Max Size and Create Stack/Queue

```
~~~MENU~~~
1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit

Enter: 1
- Create student parameters -
Enter M number (integers only): 1
Enter First Name: 1
Enter Last Name: 1
Enter Birthday: 1
Enter GPA: 1

Student Added.
```

AddItem

```
~~~MENU~~~
1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit
```

Enter: 2

mNumber: 1  
First Name: 1  
Last Name: 1  
Birthday 1  
GPA: 1

Student Removed.

**GetItem**

```
~~~MENU~~~
1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit
```

Enter: 3

The list is empty

**IsEmpty**

```
~~~MENU~~~
1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit
```

Enter: 4

The list is not full

**IsFull**

```
~~~MENU~~~
1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit
```

Enter: 5

Size of List: 2

**Size**

Enter: 6

List has been cleared.

~~~MENU~~~

1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit

Enter: 5

Size of List: 0

ClearList

Student Added.

~~~~MENU~~~~

1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit

Enter: 3

The list is not empty

**isEmpty with data in the Stack/Queue**

~~~~MENU~~~~

1. AddItem
2. GetItem
3. IsEmpty
4. IsFull
5. Size
6. ClearList
7. Exit

Enter: 4

The list is full

IsFull with data in the Stack/Queue
